Colon Cancer Is More Common Than You Think

Colon and rectal cancer is the third most common cancer in both men and women; 130,000 new cases are diagnosed annually.

SURGERY IS OFTEN THE BEST OPTION FOR A VARIETY OF COLORECTAL CONDITIONS

We offer both traditional and modern forms of surgery to treat colorectal conditions, performed by experienced, board-certified surgeons. Our minimally invasive procedures use a laparoscopic approach that offers the advantages of small incisions, less pain, early discharge, and faster return to normal activities.

OUR SPECIALISTS CAN TREAT A VARIETY OF COLORECTAL CONDITIONS:

- Polyps
- Inflammatory bowel disease (IBD)
- Diverticulitis
- Proctologic conditions (conditions of the anus and rectum)
- Colorectal cancer

We're dedicated to providing you with the best colorectal care possible.
